

10 reasons to vote KrF

KrF – together for human dignity

1. Lasting values

KrF wants to protect the values Norway is based on, as these can't be taken for granted. If we know our roots, we are also more confident in our encounters with new people and cultures. Human dignity, charity and stewardship are values on which to build the future.

2. Time and freedom of choice for families

KrF's response to families with small children is straightforward: more time and more freedom of choice. Fewer standardised solutions. Families must be strengthened – not managed. KrF wants to give families freedom of choice, so everyone can choose solutions that suits themselves and their families.

3. An age-friendly society

It should be comfortable and safe to grow old in Norway. KrF believes it's time that those who take care of their elderly are appreciated. For this reason, KrF wants dedicated support for relatives. The expansion of nursing home spaces must continue, and home care services must be strengthened.

4. Human dignity in all phases of life

All people are of equal worth. We will fight for human dignity in all phases of life. No one should be sorted away! KrF wants better support for those who have children with special needs. We strongly oppose euthanasia and weakening legal protection for unborn life. Every heartbeat is worth fighting for!

5. Industry and job creation

Today many people are outside working life. KrF will work to include more. For many families, the pandemic has been characterised by unemployment and layoffs. We must get people back to work.

6. Siding with those most in need

KrF takes the side of those who are most vulnerable in society. We will support nonprofit and voluntary players in substance abuse care and children and youth work. These are important for prevention and for helping people in a vulnerable situation.

7. A good transition from kindergarten to school

A good start in school lays the foundation for many important years in the child's life. KrF wants a greater number of dependable adults in schools and kindergartens. We want to replace the first year of school with a pre-school class where play, security and relations play a key part.

8. Vibrant local communities

KrF wants to use the entire country! We want viable agriculture that results in increased food production, better income for farmers and better protection of farmland. This will provide employment throughout the country. KrF wants safe roads and a well-developed rail network. We want better public transport solutions and broadband access throughout the country.

9. An aggressive and responsible climate policy

KrF wants to protect the earth for generations to come. The climate crisis is first and foremost a crisis for the world's poor. People are forced to flee, and we have a responsibility to help. We must contribute to stopping climate change by cutting domestic emissions and making an active international contribution.

10. Charity knows no borders

We must never become too self-content! We have a responsibility to help the world's poor and persecuted. KrF wants to maintain a high level of aid and development funds, because we see that it makes a difference!
